Ambre 9400
Children's chair

DESCRIPTION

Allows children to be active whilst seated in different environments. The adjustable functions have been developed in consultation with medical experts to provide an optimal posture whilst not restricting the child. The height can be adjusted either by hand or using your feet. The Ambre 9400 chair is available with manual or electric lift and can be delivered with several additional features such as - tilt in space, adjustable backrest, head rest and a brake as it is a part of the same modular system as the adult chairs.

The Ambre 9400 Children's chair is designed to be used in the Home, and in Educational facilities for younger children, resulting in replacing the equipment for the home with just a chair that achieves most needs.
